## Personal statement

---

Computers had always inspired me, growing up as a child, I watched my father set up computers and networks and I was always fascinated when he explained the steps and procedures to me, this prompted me to take a career in computer science. I love anything related to computers, there is nothing boring in them which makes me put 100% effort into everything I take on. I also love learning new things and evolving technologies to broaden my scope and knowledge. Outside my life of Coding, I love playing Sports, Drawing, Cooking and spending time with Friends and Family.

## Key Skills and Competencies

---

- Highly organized and disciplined with a passion for Information Technology.
- Knowledge of multiple programming languages.
- A positive, high energy team player.
- Able to quickly learn new technologies.
- Good coding skills.
- Willing and ready to improve.
